

NATIONAL FEEDER & STOCKER CATTLE SUMMARY - WEEK ENDING 02/26/2010

RECEIPTS:	Auctions	Direct	Video/Internet	Total
This Week	295,700	56,700	4,300	356,700
Last Week	255,600	72,100	48,000	375,700
Last Year	248,400	44,000	6,400	298,800

Compared to last week's sharp gains, feeder steers and heifers weighing over 700 lbs sold mostly steady with several areas reporting newfound weakness to offset those that were still realizing strength left over from last week.

Stocker cattle and calves continued in high demand with price levels firm to 3.00 higher and some instances quoted as much as 7.00 higher than last week's advances. Pressure was placed on the heavier feeders as the CME cattle futures opened the week lower and packers were able to talk feedlots into an early-week trading session at price levels that were steady to 1.00 lower, stifling the recent fed cattle market rally that cattle growers have cheered-on for the past three weeks. Live slaughter cattle sales ranged from 89.00-92.00 (91.00-92.00 in the Southern Plains) and dressed sales were from 144.00-145.00. Hedged feeders fell victim to an opening in the basis between cash and the maturing February Live contract that fell nearly 2.50 this week to end its reign as the spot market. Stocker cattle trading remained active this week but were not quite as whippy as last week, with price levels reaching the point of diminishing self satisfaction for auction buyers that looked like a gaggle of texting teenagers as they figured price per head on their calculators. Salebarn receipts were fairly heavy this week as country road conditions improved in many areas and sellers were able to move their livestock to market. No one escaped the cold weather this winter with snow measurements recorded in all 50 states at the same time in February across the United States. However, signs of spring were reported this week as a few cattlemen unzipped their coveralls and folded up the earmuffs on their stocking caps. Most Americans can't remember a longer and colder winter, as we anticipate the sun spending more time on our side of the globe. Backgrounders continue to assemble their late winter and early spring grazers, but temperatures in most areas will delay available forage for a few weeks longer than normal. Mud will be the next inhibitor as frozen fields thaw out and wheat producing farmers will want cattle moved off pastures prior to March 15th. Cow/calf producers are starting to welcome this spring's calf crop into the world and many midwives (husbands) will stay up day and night for the next several weeks. Beef tonnage loss due to weight sapping weather has lessened the condition of every class of cattle and a higher subsequent deathloss of newborns is expected. Year to date cattle harvest is running right on schedule, but beef production (in pounds) is 1.5 percent lower so far compared to last year. This week's reported auction volume included 54 percent over 600 lbs and 44 percent heifers.
